SKILLS

Blockchain Technology

Smart Contracts

Consensus Algorithm

Distributed Systems

Solidity

JavaScript / TypeScript

Web 3

Cryptography

Data Structures

React.JS / Next.JS

Node.JS / Express.JS

PHP / Laravel

Python / C / C++ / C#

MySQL / MongoDB

Dart / Flutter

EDUCATION

Nord University 2013-2017

Bachelor's degree in computer science

Bodø, Norway

LANGUAGES

English ◆◆◆◆◆

Norwegian ◆◆◆◆◆

PROFILE

Highly experienced Full Stack Software Engineer with 7 years of expertise in designing, developing, and deploying scalable and efficient web applications. Proficient in a range of programming languages, frameworks, and databases. Strong understanding of software development life cycles, agile methodologies, and version control systems. Excellent problem-solving skills, with a passion for delivering high-quality solutions that meet business requirements.

WORK EXPERIENCE

Full Stack Blockchain Engineer

Tricentis | Austin, TX   2020-2024

- Developed and deployed smart contracts on Ethereum and other blockchain platforms, ensuring their security, efficiency, and accuracy.
- Built user-friendly DApps that interact seamlessly with blockchain networks.
- Worked on optimizing consensus algorithms to enhance the performance and scalability of blockchain networks, enabling them to handle larger transaction volumes and more complex operations.
- Developed and maintained complex web applications using modern front-end technologies (React, Next.js) and back-end frameworks.
- Designed and implemented scalable APIs and microservices, ensuring high performance and reliability of software solutions.

Full Stack Software Engineer

XOMedia.Agency | Oslo, Norway   2018-2020

- Successfully delivered over 20 web applications and platforms, some of which included complex features such as real-time data processing, e-commerce functionalities, and custom CMS solutions.
- Developed strong problem-solving skills by troubleshooting complex technical issues and delivering effective solutions under tight deadlines.
- Enhanced leadership abilities by leading small teams on various projects and contributing to company-wide tech strategy decisions.

PROJECTS

ConanSwap

Tricentis | Austin, TX   2022-2023

ConanSwap is a decentralized exchange (DEX) that allow trading cryptocurrencies and tokens on the Ethereum network.

- Co-founded the DEX and served as senior blockchain developer.
- Participated in building a community of 2K people who bought the ConanSwap crypto token.
- Built the smart contract code and increased its efficiency more than the prime competitors.

OpenFlow based Firewall

XOMedia.Agency   2019-2020

XOMedia Agency is a leading Digital Product Studio in Oslo, helping companies to thrive on mobile apps, the web, VR/AR and IoT.
